WHAT OUR CUSTOMERS ARE SAYING

We are extremely happy with the pavilion and how it turned out. We've received multiple compliments from neighbors as well.

Everything went exceptionally smooth. Such high quality!! Top notch wood!

I appreciate all of your help and couldn't have been happier with how it looks. My dad has been in construction his whole life and was impressed with the quality of this product.

Jenny

10x14 Vinyl Pavilion

Everyone loves it! It is a wonderful addition to our outdoor pool area, friends have plenty of room to get out of the sun. They love how massive it is and solid.

We could not be happier! Every piece is solid and well made, it's a work of art. We enjoy it almost everyday day, perfect for our home.

Recommend very highly.

Michelle Schummer

18x18 Grand Cedar Pavilion

Thank you so much for the Great service from the Research through to the delivery. You do not find Great service like this at too many places anymore.

Most places you are just a number. With your company I felt like someone cared and took a professional approach to a business deal. Once again thanks.

R. Bulman

10x16 Cedar Pergola

I LOVE my pergola. It was erected last December and I have shared it with my family and friends several times as we celebrate life!

I have received nothing but great compliments about it with respect to its beauty and structure. It is truly wonderful and very much enjoyed by all who come into my back yard.

Ruth G.

12x14 Arched Cedar

We absolutely love our pergola. It adds great appeal to our yard. We hosted two large parties since it was built and it is the first thing that people have noticed and we have gotten so many compliments!

Everyone loves it. I have already referred one person to your company and others have been asking as well. Thank you,

John Z.

Triangle Cedar Pergola

Our finished pergola is absolutely beautiful. We have received many comments from friends, family, and neighbors on how beautiful the pergola looks on our patio. The quality of the product and the beautiful mahogany finish is perfect.

My husband has been a tradesman carpenter for 40 years and said the pergola was so well put together.

We couldn't be happier!

Donna and Paul Boeggemen

Serenity Cedar Pergola, Roof-Mounted

We love our pergola. We were able to easily hang curtains and lights from the structure. It does an amazing job providing shade and looks beautiful.

I have given many different people your name because they loved our pergola so much. People say that it makes it look like we have a huge room on the back of the house. They like the idea of no maintenance as well.

J. Sunderland

16x16 Fiberglass Pergola

I am super impressed with the quality, cuts, and predrills. The whole thing is a work of art. The craftsmanship is off the charts.

Loren Erwin,
1/30/2018
26x15 Grand Cedar Pavilion

This was a unique build as we had to tie one side of the pavilion into an existing flat roof. Since this was going to be 3' taller than standard, we decided to go with an 8X8 build. It is BEEFY.

Every time I enter the pavilion and the aroma of cedar hits me and I see this massive beautiful structure I can't help but smile and instantly relax. What an incredible space!

Every project like this is going to have hiccups and mine had a few minor ones like plan revisions and challenges with attaching the pavilion to an existing flat rubber roof.

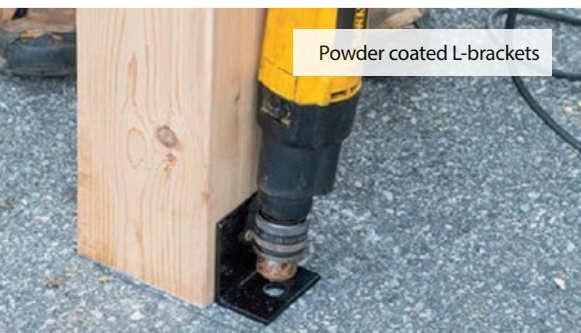

However, your design team and on-site assembly team were all quick to respond, discuss, revise, and explain everything from my initial inquiry to after completion. Communication couldn't be better.

J. DiLorenzo

15x28 Grand Cedar Pavilion

WHY OUR CUSTOMERS LOVE OUR STRUCTURES

Post mounting brackets

Powder coated L-brackets

Stainless steel post mounting bracket anchoring a 6x6 post to concrete.

Moldings to conceal heavy duty post brackets.

- **Handcrafted to Your Specifications:** You tell us the dimensions, and we fabricate to your specs. Want your post centers 10'-4" apart? No problem. Want an extra 8" roof extension on one side? No problem. We fabricate your structure exactly the way you want.
- **Fully customizable:** Choose your exact structure's length, width, and height to fit your patio. Choose the position of your posts to make room for obstacles. Eliminate posts to preserve a view. Choose wider posts, pick your own rafter tail design, add a lattice roof... you name it.
- **Highest quality material:**
 - Our pergolas are made entirely of Western Red Cedar #1 Grade, sourced from the States of Washington and Oregon, kiln-dried and finished smooth to the touch.
 - Our structural fiberglass is made in the USA, using the highest quality materials and time-tested fabrication methods.
 - Our vinyl pavilions are made of pressure treated timbers SYP #1 grade, faced with Wolf Trim™ high density cellular PVC.
 - We proudly source all materials from the USA.

► **Quality Craftsmanship:** We notch your timbers to enhance your structure's appearance, stability, and durability. This eliminates the need for unsightly hardware.

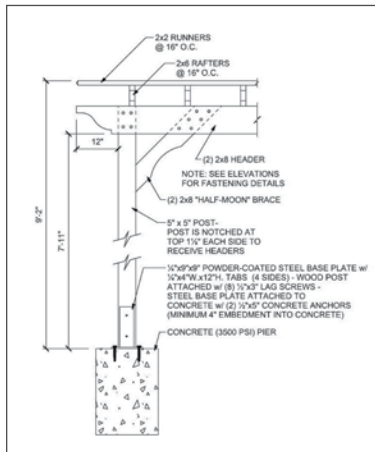

- Posts are notched for beams
- Beams are notched for rafters
- Rafters are notched for top runners

► **Warranty:**

- Our cedar structures carry a 10-year warranty
- Our structural fiberglass structures carry a Lifetime Warranty
- Our vinyl structures carry 10-year warranties

► **Drawings:**

- **Shop drawings:** Before we even begin fabrication, we send you a set of shop drawings. Shop drawings feature several elevation views and plan views. They also detail the size and spacing of all timbers. Review these drawings and let us know if you are happy with them. If not, we will incorporate your requests into your design. You may submit these drawings to your local permitting agency or homeowner's association for approval.
- **Engineer stamped drawings:** Drawings stamped by an engineer are available at market rates. We use an outside engineering firm familiar with our designs.

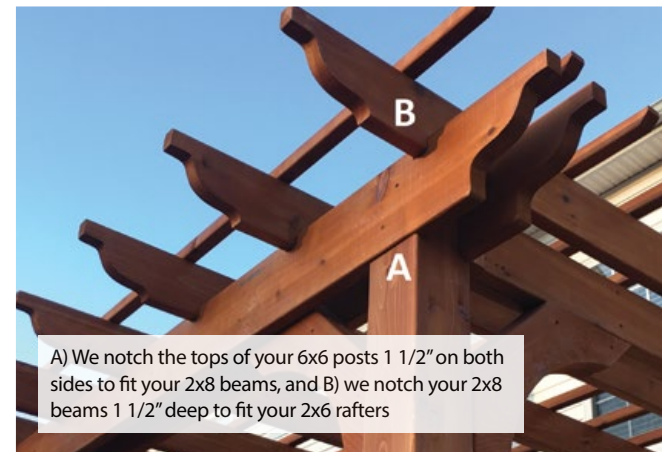

Optional heavy duty post anchors. Made of quarter-inch thick powder coated steel, these weigh 18 lbs. each

Post bottom moldings

We notch your 2x4's to fit snugly into your 2x6's

A) We notch the tops of your 6x6 posts 1 1/2" on both sides to fit your 2x8 beams, and B) we notch your 2x8 beams 1 1/2" deep to fit your 2x6 rafters
